Canyon Guide Book in Print!

We are pleased to announce that Your Guide to the Grand Canyon is now available to own. Written by Tom Vail, Mike Oard, and DSA people John Hergenrather and Dennis Bokovoy, this guide is unlike anything else on the market!

This essential handbook provides detailed information on the geology, climate, formations, fossils, history, and ecology of this national landmark, intertwined with a powerful biblical perspective—refuting the evolutionary view of the Canyon’s origins. Packed with panoramic photos, fold-out pages, suggested itineraries, and sites you can’t miss, Your Guide to the Grand Canyon is an information-rich treasure that points you in the right direction.

This is the first of the “True North Series” guides to the National Parks, and is an 5.5 by 8.5 inch, hard backed and spiral bound book with 190 pages, including 3-page fold-outs for all the major overlooks on both the North and South Rims of the Canyon.

Now is the time to plan on getting this resource—to be ready for those Southwest USA summer vacations!

Available at the DSA Booktable for $10.00 each—at this price, you can’t afford to be without one!

The Mitchell Traveling Dinosaur & Fossil Museum!

AT OUR NOVEMBER MEETING, speaker JD Mitchell will host an interpretive slide-show presentation for the Mitchell Traveling Dinosaur and Fossil Museum. The museum will be set up and “fully operational” for people to look at during break and after the talk.

This presentation is designed to stress the importance of presuppositions in the development of worldviews for each and every person. Mr. Mitchell will explain how the evidence in the Dinosaur & Fossil Museum can educate people of all ages about the truth of God’s General Revelation (i.e. His Creation) and help them correlate that truth in a consistent and coherent way with God’s Special Revelation, the Bible.

Museum topics and themes that he will explore are:
- Worldview Model Predictions
- Life’s Design
- How Fossils are Formed
- Dinosaurs in the Fossil Record
- Homology
- Details about Dinosaurs
- Dinosaurs and Man.

THIS MONTH’S DSA MEETING WILL BE HELD ON the second Saturday, November 8, 2008, from 9 to 11:30 AM. Be sure to attend this meeting to learn and observe some of the “hard and rocky” facts about origins!
Recently showing in movie theaters, Ben Stein’s, Expelled: No Intelligence Allowed has just been released on DVD! This 90-minute movie uncovers the dramatic exposition of the current and often hidden persecution of educators and scientists who are being denied tenure and even fired in some cases, for their belief in the evidence of “design” in nature, challenging the idea that life is a result of random chance or the result of evolution. Unlike other documentary films, Expelled doesn’t just talk to people representing one side of the story. The film confronts scientists such as Richard Dawkins, author of The God Delusion, influential biologist and atheist blogger PZ Myers and Eugenie Scott, head of the National Center for Science Education. The creators of Expelled crossed the globe over a two-year period interviewing scores of scientists, professors, philosophers and politicians that have been expelled from publicly-funded institutions. High schools, universities and research institutions will love this movie!

Available for $18 at the "famous DSA Booktable"!

Intelligence is Permitted at DSA!
